

# District-Wide Freight & Sustainability Plan

## Project Location Map

## Anticipated Completion

December 2026

## Project Background

The CID recently won a [Freight Cluster Grant from the Atlanta Regional Commission \(ARC\)](#) to review the area's infrastructure and commuting patterns to create a sustainable freight network. Their study will focus on a district-wide strategy for:

- improving workers' quality of life
- reducing greenhouse gas emissions
- improving efficiency in freight transportation
- enhancing supply chain resilience
- supporting sustainable transportation practices.

## Project Description

The CID has hired an expert consulting team to help complete this plan. They are currently working on solutions for:

- **Reducing greenhouse gases:** using more alternative fuels, electric vehicles.
- **Making freight more efficient:** finding better routes for trucks, supporting intermodal transportation.
- **Supporting the supply chain:** reducing idling time for trucks, reusing and recycling products, and improving worker conditions
- **Improving site sustainability:** adding green roofs, water recycling, solar power, etc.
- **District-wide improvements:** increasing walking paths, green space, and transport options for workers and residents.

## SR 74 at I-85 Interchange Reconstruction

### Anticipated Completion

Fall 2027
