

**South Fulton Community Improvement District Phase II Freight ITS Preliminary Engineering Request for Proposals: Addendum 2**

The evaluation criteria will no longer include cost as a factor in the first round of review. A selection committee will be convened to evaluate the proposals based on the following weighted criteria:

<u>Firm/Staff Qualifications.</u>	35%
<u>Technical Approach.</u>	35%
<u>Project Understanding.</u>	15%
<u>Work Plan and Schedule</u>	15%
<i>Total:</i>	100%

The selection team may choose to hold interviews with top ranked consultant(s) or move directly to negotiation with the top firm. A meeting will be held with the top ranked firm to discuss the project and their proposals. Minor scope and fee modifications may be made and if the top firm and the South Fulton CID come to terms, a contract will be drafted. If the parties cannot come to terms, the second ranked firm will be contacted, and negotiations will ensue. This will continue until a firm is under contract.

The South Fulton CID reserves the right to reject any or all proposal, to select without interviews, or to make no selection at all.
